

Veritas Corporate Licensing Program Data Sheet

Streamlined access to the industry's leading information management solutions for academic organizations

Overview

The Veritas Corporate Licensing Program (CLP) is designed to provide any commercial organization a simple purchasing process to access our entire portfolio of software, appliances, maintenance/support and services (Offerings).

CLP purchases issue with standard certificate-based terms and can be made through any Certified Veritas Partner.

To participate in the Veritas CLP, customers simply request a quote and submit their PO to their chosen Veritas Partner. In return, customers will receive a certificate directly from Veritas which confirms their order and indicates terms and conditions for the items purchased.

All customers will be assigned a unique identifier at the time of initial purchase. This identifier will be used to track additional purchases and can be used to effectively view, track purchased Offerings and maintenance/support renewals.

Additional information on the Corporate Licensing Program can be found at www.veritas.com/licensing/corporate

Key Features and Benefits

- No minimum purchase
- Easy to buy via standard certificate-based terms and conditions
- Access to entire Veritas Offering
- License deployment in country of purchase*
- Built in quantity tiered discounts within specific product families

*Customers within the EU can request broader EU deployment rights directly from Veritas
